CONTINUOUS BAG SEALING MACHINE

Wide range of models for choice-horizontal, vertical, portable sealing configurations. Light or heavy duty, single or twin conveyor table. Special models are available.

Chyng Cheeun Machinery Co., Ltd...

A most trusted sealing machine brand.....

Professional Technological Background ... Excellent Technicians ... Brilliant Machine Performance ...

Established in 1981, Chyng Cheeun is a specialist in design and manufacturing of the most comprehensive range of continuous bag sealing machines.

Through years of efforts, Chyng Cheeun has become a leader among the sealing machine manufacturers in Taiwan. At Chyng Cheeun, we insist on quality and excellent manufacturing system. To this end, we always follow the demands of ISO900/ quality assurance system, and implement effective management and practical enterprise operation. In addition, rigorous quality control is conducted throughout the entire manufacturing process Chyng Cheeun products have been CE certified, and Chyng Cheeun has obtained several awards, such as R & D award and Golden Dragon award for exquisite machinery. Chyng Cheeun products have obtained several patents in Taiwan.

The full series of Chyng Cheeun products have passed safety regulations and obtained several awards. All these reputations fully represent Chyng Cheeun's dedication to constant progress and innovation and insisting on quality. Chyng Cheeun has accumulated over 30 years of manufacturing experience, and we have outstanding technological background to manufacture high performance food packaging equipment to serve our customers. Furthermore, we also offer technical consultancy for our customers. We not only provide basic machines, but also whole-plant equipment in clouding technical transfer.

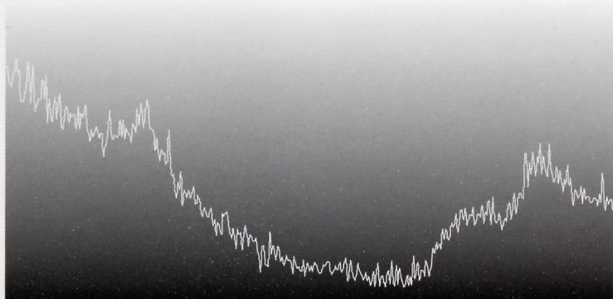

CHYNG CHEEUN bag sealers are manufactured by the fine craftsmanship.

CHYNG CHEEUN bag sealers were sent to EMC (USA) for emission test.

Chyng Cheeun Sealing Machines Meet International Quality Standards

Chyng Cheeun has marked and technological cooperation with many developed countries, providing more competitive products and better services to customers. Chyng Cheeun products not only share big market in Taiwan, but also have been sold to over 85 countries around the world, such as U.S.A, Australia, France, Italy, Saudi Arabia, UAE, New Zealand, Motherland, Singapore, South Africa, Britain, Germany, Japan, Africa and Indonesia etc. We appreciate it very much for customers' long-term supports, and we will do our best to provide the best quality equipment and service for users' satisfaction and loyalty of agents.

CC-6201

CC-6202

LIGHT DUTY SEALING MACHINE

P : Printer (Optional)

S : Stainless Steel Machine Frame (Optional)

- The smallest model performs horizontal sealing operation.
- Fully gear drive assures long service life and superior sealing quality.
- Combines bag sealing, knurling and date coding (optional) operations.
- IC controlled circuit provides convenient maintenance.
- Variable conveyor speed.
- Accommodates both teflon and steel sealing bands for sealing all types of plastics polycell, and aluminum foil bags.
- Conveyor can be horizontally and vertically adjusted to meet various bag sizes.
- The cooling fan ensures maximum tightness of seal.
- Comprehensive safety guards.
- Ideal for sealing dry powder, solid goods, hardware kits, stationery, electronic parts, toys, bread and medical instruments.....etc. Bag length range from 4 to 20cm. For bag length over 30cm, an additional conveyor is available.(CC-6201)
- Ideal for sealing liquid, glue, powder, hardware kits, fully packed products and oily products.....etc. Bag length range from 12 to 30cm.(CC-6202)
- Stainless steel machine frame is available.

CC-6201P
PATENT NO 198076

CC-6202
PATENT NO 198076

CC-6204

LIGHT DUTY HORIZONTAL DOUBLE SIDES SEALING MACHINE

- The smallest model in twin conveyor table series. Designed for performing sealing at both sides simultaneously. Features two CC-6201 in one.
- Two control systems permit for single or double sides operation. It provides high production capacity, high efficiency, and space saving.
- Ideal for sealing dry powder, solid goods, hardware kits, stationery, electronic parts, toys, bread and medical instruments.....etc. Bag length range from 4 to 20cm. For bag length over 30cm, an additional.(conveyor is available.)

CC-6204
PATENT NO 198076

CC-6205

LIGHT DUTY VERTICAL DOUBLE SIDES SEALING MACHINE

- The smallest model in vertical sealing twin conveyor table series. Featured two CC-6202 in one.
- Two control systems permit for single or double sides operation. It provides high production capacity, high efficiency, and space saving.
- Ideal for sealing liquid, glue, powder, hardware kits, fully packed products and oily products.ect. Bag range length from 12 to 30cm.
- This model obtained with CE declaration.

PATENT NO 198076

CC-6207

EXTRA HEAVY DUTY SEALING MACHINE

P : Printer (Optional)

- The most heavy duty model in vertical sealer.
- Manual or powered elevation (optional)
- PID screen double temperature control system.
- Fully gear drive assures long service life and superior sealing quality.
- Height of conveyor from floor 400mm. (Custom height is available).
- Seals bag height range 500-1000 mm.
- Suit with very large bag sealing such as chemical fertilizer bag feed bag, rice bag and other heavy duty granular powder package bag sealing.
- 1 phase, 220V power control.
- Suggest conveyor length at less 200cm(option).

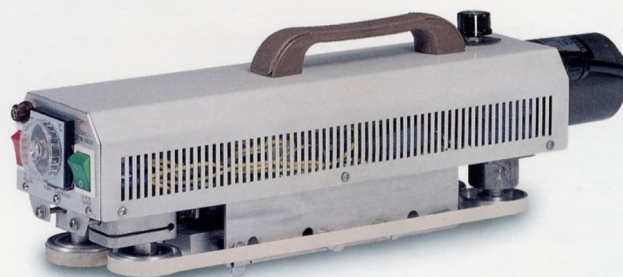

PATENT NO 198076

CC-7201

PORTABLE CONTINUOUS SEALING MACHINE

- Aluminum alloy steel portable sealing machine, stainless steel form.
- Fully gear drive assures long service life and superior sealing quality.
- Extremely light weight for convenient hand-carry.
- Variable sealing speed.
- Comprehensive safety guards.
- Ideal for sealing extra heavy bags for product such as machine, hardware, food, canvas, chemical...etc.

PATENT NO 198076

CC-7202

MEDIUM DUTY HORIZONTAL SEALING MACHINE

CC-7202 (With printer device)

CC-7203 (No printer device)

- This unit is designed for medium content bag sealing operation.
- Conveyor table tilts 0°~20° degree downward, allowing products to concentrate at bag bottom that prevent product flowing out.
- Equipped with printer for printing manufacture date, expiry date, lot number and weight...etc.(Single or double lines printing.)
- Fully gear drive assures long service life and superior sealing quality.
- Comprehensive safety guards.
- Height of sealing head from floor 730mm. Ergonomically designed to minimize fatigue.
- Ideal for sealing dry powder, solid goods, hardware kits, stationery, electronic parts, and medical instruments. Bag length range 4-30 cm. (Increased conveyor width is available).

PATENT NO 198076

CC-7204

MEDIUM DUTY DOUBLE SIDES SEALING MACHINE

P : Printer (Optional)

- Constructed with front and rear conveyor table, allowing two operators to seal simultaneously. Features two CC-7203 in one.
- Fully gear drive assures long service life and superior sealing quality.
- Designed for high efficiency sealing requirement. Especially suited for high production demand and to save handling time.
- Two control systems permit for single or double sides operation. It provides high production capacity high efficiency, and space saving.
- Comprehensive safety guards.
- Combines bag sealing, knurling and date coding (optional) operations.

CC-7204P

**PATENT NO 85591
198076**

CC-7206

VERTICAL SEALING MACHINE

P : Printer (Optional)

- A heavier model than CC-6202 with similar features, but machine frame is stronger can sustain middle package.
- Equipped with four castors for easy mobility.
- Fully gear drive assures long service life and superior sealing quality.
- Comprehensive safety guards.
- Ideal for sealing liquid, powder, glue hardware kits and oily products. Bag length range from 10 to 40 cm.
- Stainless steel machine frame is available.(option)

**PATENT NO 198076
114403**

CC-7207

HEAVY DUTY VERTICAL SEALING MACHINE

CC-7207 (With printer device)

CC-7208 (No printer device)

- The second heaviest model in vertical sealing series. Well suited for heavy content bag sealing.
- Power conveyor table raising available upon request. Raising or lowering is stopped by limit switches at the end.
- Equipped with printer, for printing manufacture date, expiry date, lot number and weight...etc., single or double lines printing.
- Bag height range 10-60cm.
- Fully gear drive assures long service life and superior sealing quality.
- Comprehensive safety guards.
- Vertical sealing principle especially suited to seal content such as hardware kits, liquid, powder, glue and oily products....etc.

**PATENT NO 198076
114403**

VACUUM TYPE SEALING MACHINE

P : Printer (Optional)

- Mounted with an exclusive vacuum suction device for fully sucking air out of the bag before sealing. Virtually extends expire date, reduces package about 70~80% volume and saves storage space.
- Standard design with fixed stand.
- Fully gear drive assures long service life and superior sealing quality.
- Equipped with printer for printing date, lot no...etc.
- Extensible stand (optional). Can be moved into the machine frame when not in use for saving space.(PATENT)
- Conveyor stand adjustment is fast accomplished in only one second.

CC-7209

**PATENT NO 15114
114403
170783**

STANDARD ACCESSORIES

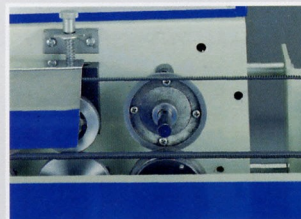

- **OPERATION MANUAL**
- **FUSE**
- **SEALING BAND**
(Choice of stainless steel or teflon band)
- **TOOL BOX AND TOOLS**
- **INK ROLLER AND ALUMINUM ALLOY WORD BOX.**
Choice of bronze or steel words. Supplied only for models equipped with date coder.

OPTIONAL ACCESSORIES

- **COUNTER:**
 - 1.Mechanical 4-digit type:
For indicating the sealed products.
 - 2.Alarm type:
LED displays the single lot number.
Once quantity reaches, alarm sounds.
 - 3.Double display counter:
LED displays the total quantity and single lot number.
Once quantity reaches, alarm sounds.
- **DATE CODER:**
For printing the manufacturing date, storage duration, lot number and weight etc. Standard printing capacity 28 words. (Double lines printing)
(Choice of bronze, steel, or aluminum words)
Custom words and logo are available.

Belt type: Employs belts to force air out of bags before sealing.

Employs two blades to trim package after sealing for neat edge.

Hydraulic type: Provides a powerful compression effect. Recommended for expanded products, such as sponge ...etc.

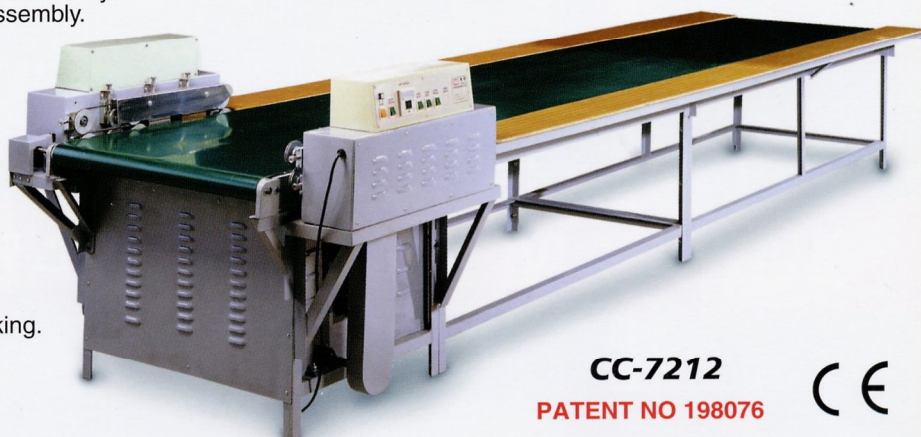

SPECIFICATIONS

MODEL		CC-6201(P)	CC-6202(P)	CC-6204(P)	CC-6205(P)
Max. conveyor belt load	(kg)	10	10	10	10

Conveyor table height adjustment range	(mm)	0 - 30	120 - 300	0 - 30	120 - 300
N. W/G.W	(kg)	30 / 35 (38 / 43)	35 / 40 (43 / 48)	50 / 60 (65 / 75)	60 / 75 (75 / 90)
Machine dimensions (L x W x H)	(mm)	800(1000) x 400 x 300	800(1000) x 300 x 550	800(1000) x 750 x 300	800(1430) x 600 x 1230
Packing dimensions (L x W x H)	(mm)	850(1050) x 470 x 350	850(1050) x 520 x 350	900(1100) x 850 x 450	900(1530) x 700 x 1430

- All specifications and design characteristics shown in this catalogue are subject to change without notice.
- Custom specifications are available to meet specific requirements.
- Bag capacity varies with product specific weight.
- Suffix (P) represents model with date coder (optional).
- () represents machine length with date coder.

PRODUCTIVE TYPE SEALING MACHINE

- A sealing machine fitted with the conveyor for efficient operations. Ideal for mass production line.
- Equipped with infeed conveyor for greatly upgrading productivity. Suitable for mass production for hardware and part assembly.
- Permits for 8 operators to work at both sides.
- Maximum loading capacity on conveyor is 150 kgs.
- Variable conveyor speed.
- The height of the conveyor from floor is 800mm.
- Comprehensive safety guards.
- Stainless or wood tables on both sides. Foot stands under table allow operators to sit for working.
- Equipped with product storing channel.
- 1 phase, 220V power system.

CC-7212
PATENT NO 198076

• POWER TABLE RAISING:

Available only for vertical sealers. Motor drive with limit switch control for entire stroke. Provides effortless and convenient elevation of conveyor table.

• TRIMMERS

Designed to trim the bag edge after sealing. Furnished with one set spared blade.

• WATER COOLING SYSTEM:

Provides fast cooling effect and ensures secure sealing line.

• BAG COMPRESSION UNIT:

Choice of belt or squeeze type. It forces out the air in the bag. Excellent for packages such as sponge, soft products and gloves for saving package volume.

• DIRECTION OF FEED:

A reversible feed is available. (Feed from right to left)

• AIR BLOW ATTACHMENT:

For filling air into bags to prevent package crashing and upgrade visual effect.

• TUBULAR LEGS:

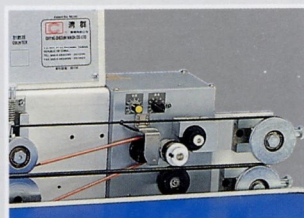

Fitted with 4 castors and built-in tool cabinet. Available for CC-6XXX series only.

• VACUUM SUCTION DEVICE:

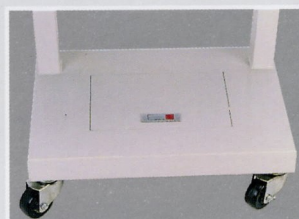

With vacuum suction pump for sucking air out of bags. It saves package volume and extends expiry date.

• STAINLESS STEEL MACHINE FRAME:

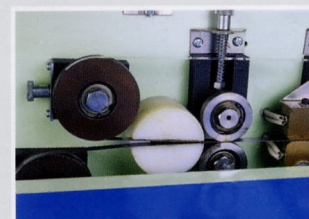

Sealing machine series with stainless steel machine is available.

Printing dates, lot No. and weight....etc.

Castors provide easy mobility of the machine.

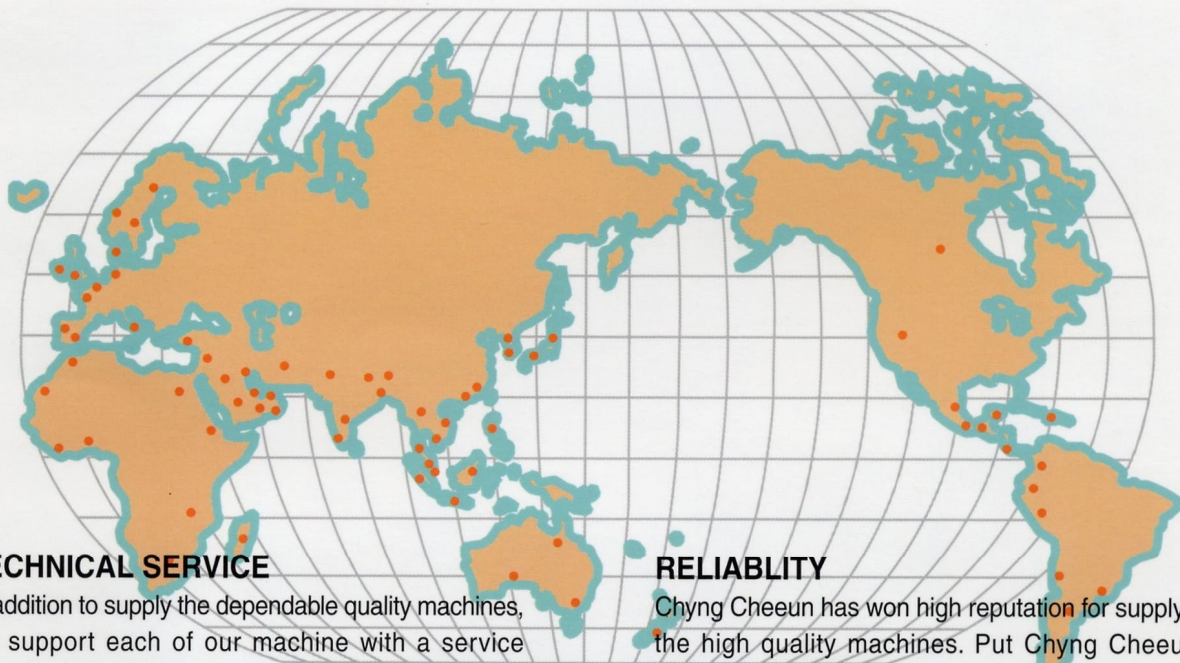

To evacuate air out of bag.

- Vacuum Packing Machines
- Rice And Bean Processing Machinery
- Bakery Equipment
- Film Packing Machine

SERVING THE WORLDWIDE MARKET

TECHNICAL SERVICE

In addition to supply the dependable quality machines, we support each of our machine with a service department that has the experience and expertise to solve your packing problems. Our technical service personnel are specially trained to answer your questions and help you to select the correct machines that best suit to your specific requirements.

RELIABILITY

Chyng Cheeun has won high reputation for supplying the high quality machines. Put Chyng Cheeun's reliability to work for you. Choose the machines from our wide range of products. You will get your needed machines with delivery as specified, correct specifications and at the most competitive prices. Just as all Chyng Cheeun's customers have since the company established. No matter what machines you choose, you will find Chyng Cheeun machines are dependable.
